- Game Design
- Game Development
- Github
- Problem Solving

INTERESTS

- Magic The Gathering
- Tabletop Games
- Video Games
- Dungeons and Dragons
- Social Gaming Events

PROFILE

I am a Games Technology student graduating from the University of West England in Bristol in July. I have had a deep love of computer science since taking the course as my GCSE in high school, and have developed problem-solving skills since taking computer science as my A-Level. I chose to apply my skills to the study and goal of creating video games as it is the greatest form of entertainment, and I would love nothing more than to see my work come to life and excite others. Video games have the ability to bring people together, tell stories, and instill emotion. So, my passion is to continue the influence that video games have, and to raise the games industry to a new height in their art. Therefore, I am applying for Graduate Programmer, Game Tester, and Junior Developer positions to achieve that dream, and to develop my skills and understanding of video games so I can work as a team to develop new experiences for players.

WORK EXPERIENCE

CeX

2022 - PRESENT
